

ABSTRACT

An object of the present invention is to provide novel saccharides,
3- α -glycosyl α,α -trehalose having a 3- α -glucosyl α,α -trehalose
5 structure represented by the chemical formula 1 within their molecules,
their preparation and use. The present invention attains the above
object by providing 3- α -glycosyl α,α -trehaloses having a 3- α -glucosyl
 α,α -trehalose structure represented by the chemical formula 1 within
their molecules, their preparation and use.

10

Chemical formula 1:
